

Fragile Forest

Tip Sheet

Let's Have a Zoo-rific Time!

Pre-visit

Watch this video to plan your learning journey to Fragile Forest.

Introduce Fragile Forest and some of the animals to your students before your visit:

- [Fragile Forest zone](#)
- [Brief introduction to Fragile Forest](#)

Getting To Fragile Forest

On foot

From the entrance, take a 25-minute stroll to Fragile Forest through Wild Africa.

By tram

From the entrance, take a 10-minute stroll to Tram Station 3. Board the tram & alight at Tram Station 4, Fragile Forest.

Download the Mandai App to view the map on mobile

During Visit

Try out the suggested activities highlighted in the video [Video Guide – Fragile Forest](#). Below are additional ideas to consider.

Can you spot me?

Spot an animal that is well hidden and discuss how camouflage helps animals to have a better chance of survival.

Additional things to note:

See if you can...

- locate the sculptures of the smallest and largest frogs in the air-conditioned room.
- find shower puffs in the butterfly aviary that are soaked with sugar solution to feed the fluttering beauties.

Who lives in the rainforest?

Use the See-Think-Wonder Thinking Routine to investigate animals you can spot on the forest floor, in streams and in trees.

Additional prompting questions:

1. "What animals do you see perching on the branches?"
2. "What food do you think the animals like best?"
3. "I wonder what animal lives high up there?"

Who's your favourite rainforest friend?

Recall and act out the behaviour of the animal you enjoyed seeing today in Fragile Forest.

Additional activity:

Do the action of...

- any animal you see on the forest floor.
- any animal you spot in the trees.

Word Bank

Here are some words that might be new to your class.

Essential Agreements

Simple guidelines to regulate your children's behaviour that you get your class to agree to.

Amphibian

Animals that live on land and in water during certain stages of their cycle. There are, however, exceptions such as the fully aquatic Titicaca Lake frog, which spends all its life in water.

Predator and Prey

If an animal hunts another animal, it is a predator. If it is eaten by other animals, it is a prey. An animal may be both.

Invertebrates

Many people call these animals 'bugs' but animals without a backbone should be correctly called invertebrates.

Camouflage

Camouflage helps animals to blend in with their surroundings. It can be colours or patterns of body coverings, and/or body shapes. It is nature's way of playing hide and seek.

I Spy

Animals can be found in different parts of the forest. Some in streams, on the forest floor and in trees. Can you spot these animals in Fragile Forest?

Forest Floor

Malayan
Horned Frog

Madagascan
Hissing
Cockroach

Lesser
Mousedeer

Streams

Spotted
Whistling Duck

Axolotl

Trees

Great Eggfly Butterfly

Eclectus Parrot

Malayan Flying Fox

Gray's Twig Insect

Post-Visit

Extend learning in your classroom

Invite your students to find out more about one **local** rainforest animal through a home-school project and do a show-and-tell for their peers.

Some ideas:

Find out about the animal's...

Diet

Physical
Characteristics

Habitat

You may wish to create a diorama of the animal in its rainforest home.
