

The Predators @ Birds of Prey

Shhh, move quietly as we do not want to alert the birds here. They are built for the kill. Not convinced? Study the birds carefully and you will discover their amazing adaptations designed to kill.

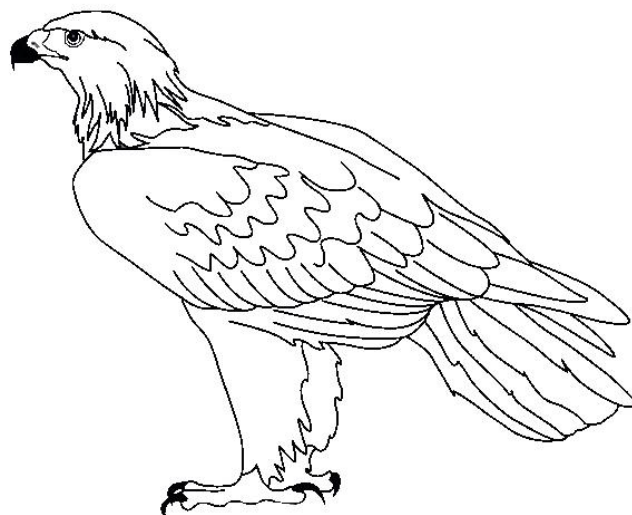

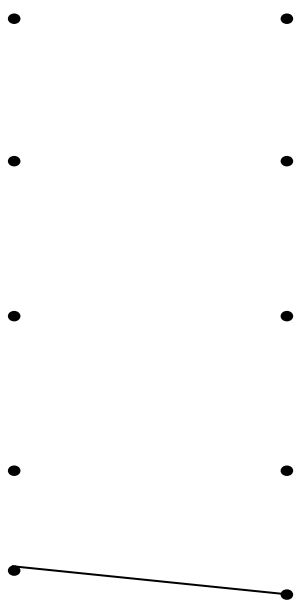

A. Match the adaptations with the correct Bird of Prey.

Adaptations

A 3-metre wingspan to soar high in the sky	•
Well known for its snatching ability and superb accuracy	•
Feet equipped with relatively straight talons for digging and walking	•
Long curved talons to lock fish, eels and snakes in its deadly grip	•
It uses its feet like a sledge hammer and wings as boxing gloves	•

Birds of Prey

• White-bellied Sea Eagle
• Andean Condor
• Brahminy Kite
• Honey Buzzard
• Secretary Bird
