

## News Brief @ Wings of Asia

Javan mynahs are found commonly in Singapore. They have black feathers, yellow beak and feet. In Wings of Asia Aviary, we can find its cousin. Although they are related, they do not share the same fate. Find this bird and complete the following tasks.

- i) What is the name of this bird?

\_\_\_\_\_

*[Hint: It has white feathers and blue skin around the eyes.]*

- ii) It is classified as \_\_\_\_\_ under the IUCN Redlist and is on the brink of extinction. There are only about 50 of them left in the wild.

- iii) Name one threat that this bird faces.

\_\_\_\_\_

- iv) Jurong Bird Park is partnering an organisation in Indonesia to breed these birds for release into the wild. Name this organisation.
